

A COMPUTER CONTROLLED DISPLAY SYSTEM WITH SCROLL BAR
MEANS FOR INDICATING THE TYPE OF DATA BEING SCROLLED
AT PARTICULAR LOCATIONS IN A DISPLAYED DOCUMENT

Abstract

5 Scrolling through lengthy Web pages or other
documents in search of particular data types or files is
simplified. In a system for scrolling a displayed
document using a scroll bar for indicating the position
of the displayed data in the direction being scrolled,
10 there is provided an implementation for determining the
type of the displayed data being scrolled at a position,
in combination with an implementation responsive to this
determination for indicating within said scroll bar the
type of data being scrolled at said position. A color
15 indicator has been found to provide very effective
indication.
